Summary

Frontend Developer with hands-on experience building scalable, responsive web applications using React, Redux, JavaScript (ES6+), HTML, and CSS. Skilled in developing reusable UI components, dynamic dashboards, and integrating REST APIs. Strong focus on performance optimization, clean code, and user-centric design.

Skills

Languages: JavaScript, NodeJs

Technologies: ReactJS, NextJS, Redux, Git, Github, Tailwind

Experience

Frontend Developer

Jan 2025 – Current

Haven Infoline Pvt Ltd.

- Developed and maintained scalable, modular frontend applications using **React, Redux, and modern JavaScript (ES6+)**, supporting complex dashboards, data tables, and multi-step workflows with responsive and cross-browser compatible UI.
- Designed and implemented reusable UI components and dynamic, validated forms, including inline editing, role-based fields, multi-select inputs, and modal-driven workflows, significantly improving development speed and UI consistency.
- Integrated frontend applications with **RESTful APIs**, managing global and local state using Redux, handling async data fetching, error states, optimistic updates, and form validations for data-driven features.
- Collaborated closely with **backend, design, and product teams** to deliver high-quality features, optimize performance, refactor legacy code, and debug production issues, ensuring stable and maintainable releases.

Projects

Project & Task Management System | *ReactJs, Redux, JavaScript (ES6+), REST APIs, DHTMLX Gantt*

- Built and maintained a full-scale project and task management application with features including projects, tasks, subtasks, sprints, milestones, and role-based access.
- Implemented data-heavy tables with pagination, sorting, filtering, expandable rows, and inline editing.
- Integrated Gantt chart visualization for task and milestone tracking using DHTMLX Gantt.
- Developed dynamic, validated forms and complex workflows for task creation, assignment, and status transitions.
- Improved performance and maintainability through reusable component architecture and clean state management patterns.

Facility Management System (Core Product Modules) | *React.js, Redux, JavaScript, REST APIs, WebSockets*

- Contributed to the company's core Facility Management product, developing and enhancing key modules used in production.
- Built reusable UI components and forms aligned with product design standards.
- Collaborated with backend developers, designers, and product teams to deliver features, fix production issues, and optimize performance.
- Participated in debugging, refactoring, and improving existing modules for better user experience and stability.

Achievements & Certifications

- Owned end-to-end frontend development of a Project & Task Management system, delivering scalable UI workflows and data-heavy dashboards.
- Improved application performance and maintainability by implementing reusable components and optimized Redux state management.
- ReactJs & Redux - Udemy

Education

Bachelor of Computer Application

Graduated: 2023

Modern College of Arts, Science and Commerce, Pune

CGPA: 8.0 / 10
